Hot Docs + Hot Rocks Make Cool Exhibit

July 13, 2015

CRS Library Assistant Debbie Emley has shared a beautiful collection of agate, pumice and other rocks and fossils in a new exhibit called *Wonders of the World* in the Government Documents Exhibit near the Information Desk. Pictures of this collection are available on the [Current Exhibit LibGuide](#). Debbie recently cataloged the *U.S. Geological Survey Professional Papers* as part of a retrospective cataloging project of some older government documents that are now being housed in our Automated Retrieval Collection (ARC), prompting the interest in an exhibit to bring together her collection with the Professional Papers series. For questions about the series, contact Lori Gwinett at lgwinett@georgiasouthern.edu.
